Segreto - reliable innovative architectural window systems for various interior and complex design projects

Segreto – 110 % energy efficiency, space, comfort, design from one hand

When in the open position, the door does not take up space inside the room, whilst enabling a very good contact with the environment which further increases the comfort of use. gives you great possibilities in applications of lift & slide doors, and is the optimized solutions in terms of construction and dimensions of its profiles and frames. With its high thermal and sound insulation, combined with excellent water, air tightness, and security glass meets all the requirements for energy conservation and environmental protection. slender and robust, 3-chambered profiles, with insulating chamber equipped with wide thermal breaks in the central part solution that is both aesthetic and economical, relatively low heat transfer coefficient for frames (U_f) assured by wide thermal breaks, polyethylene inserts and chambered profiles mounted in thermal insulation strips, high water and air tightness assured by speciallyshaped gaskets and hardware that allow the leaf to embed on the frame in the final stage of closing the lea 3x chamber double-glazed window with krypton gas is made of laminated energy-saving protective glass provides protection from breaking and cold.
